Search Side-Bar
Showing category, publisher, file path, package or file type information to the current results, quickly filter results from there

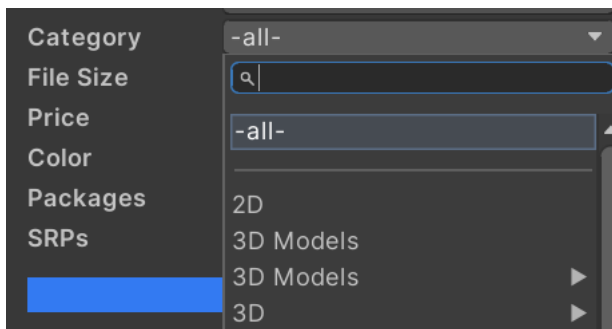

ASSET INVENTORY – WHAT'S NEW

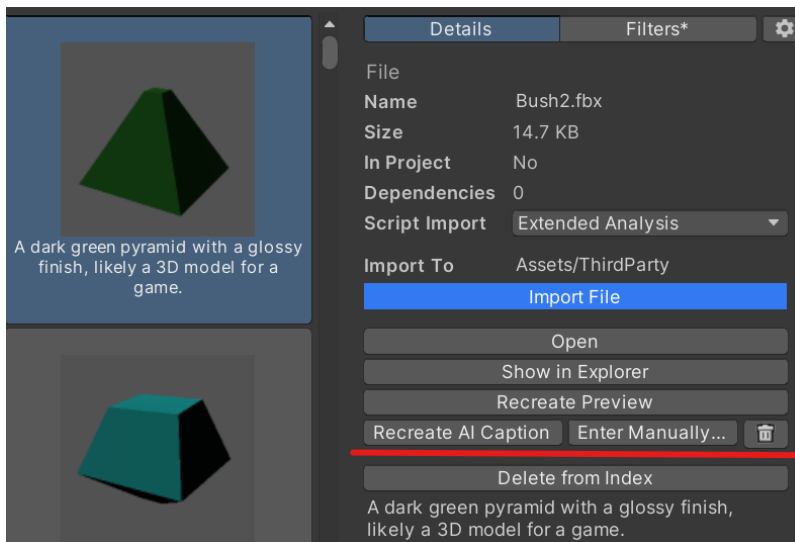

Audio Editor

Cut, trim, normalize and fade audio files directly in the editor before importing

Searchable Dropdowns

Find items quickly

AI Caption Management

Add, edit & remove captions manually, improved captions by adding asset metadata to captioning process

ASSET INVENTORY – WHAT'S NEW

Details		Filters	⚙
File			
Name	character-c.fbx		
Size	0.5 MB		
Animations	27		
Meshes	6		
Materials	1		
Vertices	143		
Triangles	72		

FBX Model Data

Mesh, material and animation data

FBX Animations

'character-c.fbx' in asset 'Kenney Game Assets All-in-1 3.3.0'

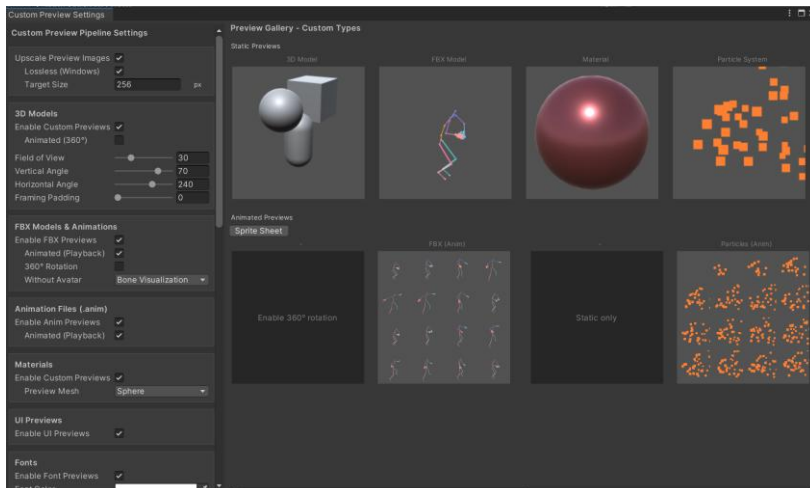

Animations	27
Meshes	6

Animation Clips

attack-kick-left	0.6 Sec
attack-kick-right	0.6 Sec
attack-melee-left	0.4 Sec
attack-melee-right	0.4 Sec
die	0.3 Sec
drive	0.2 Sec
emote-no	0.7 Sec
emote-yes	0.7 Sec
holding-both	0.2 Sec
holding-both-shoot	0.2 Sec
holding-left	0.2 Sec
holding-left-shoot	0.2 Sec

Animation List

All animations contained inside an FBX

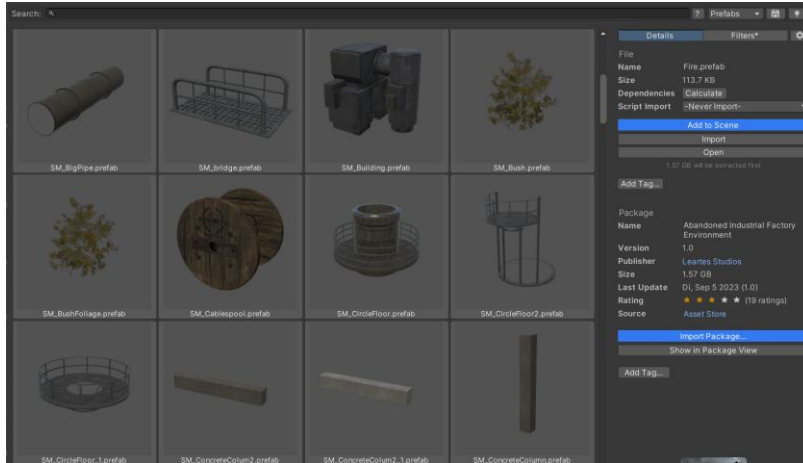

Custom Preview Pipeline

Custom algorithms to create previews for prefabs, models, UI, fonts, materials, videos and more

ASSET INVENTORY – WHAT'S NEW

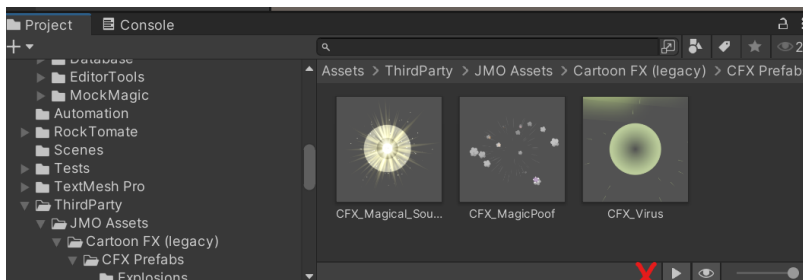

High Quality Previews

Vastly improved previews with higher resolution, anti-aliasing, lighting, custom backgrounds and much more

Animated Previews

Animated previews for VFX, particles, FBX animations and videos

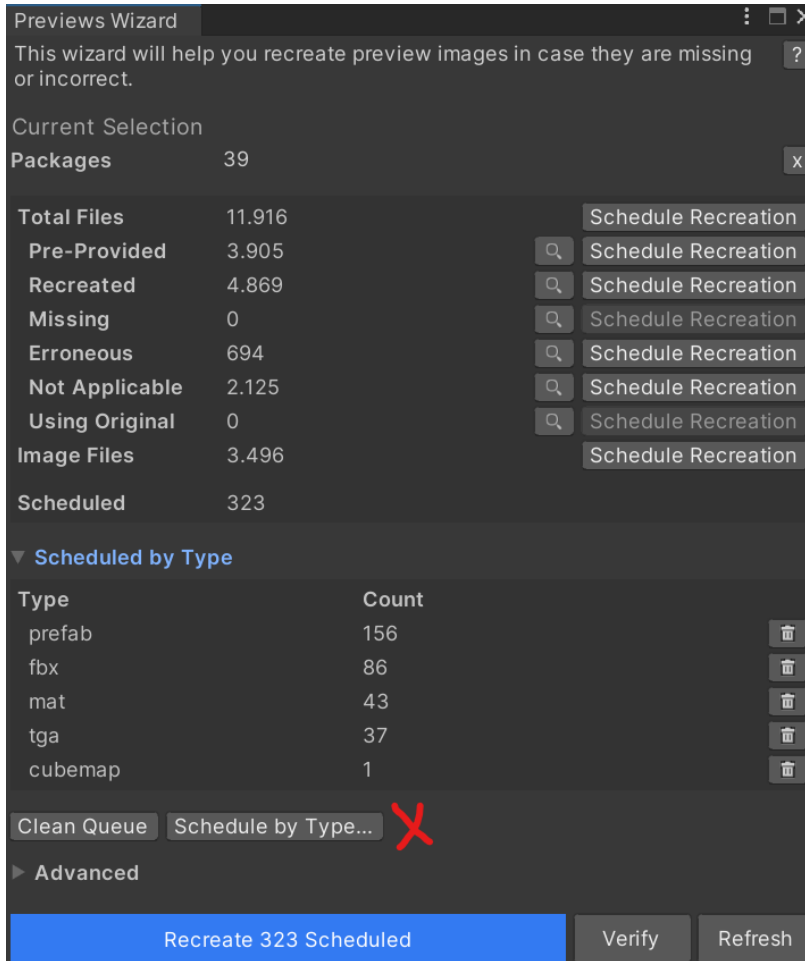

Project Window Integration

Beautiful previews directly in the project window, static and animated

ASSET INVENTORY – WHAT'S NEW

Preview Handling

Much improved preview recreation, schedule by type, see queue by type, much faster and more powerful overall, more automation with less user interaction required

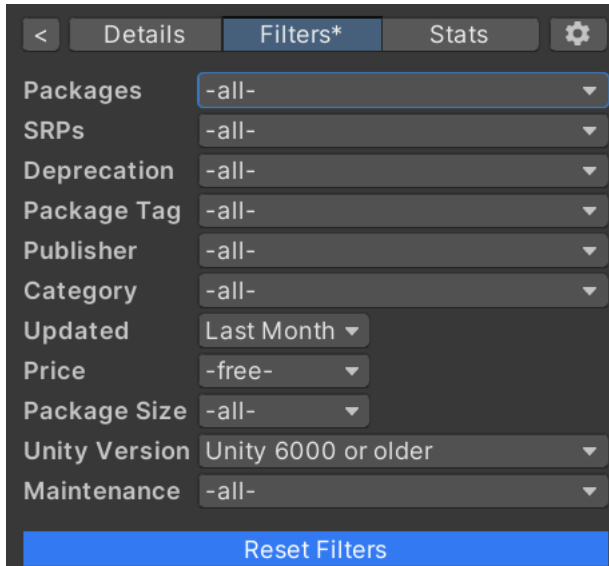

Nested Tags

Parent/child relations to easily return child items when filtering for parents

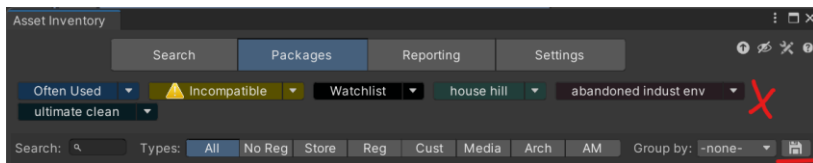

ASSET INVENTORY – WHAT'S NEW

New Package Filters

Filter by category, date, price, size, Unity version

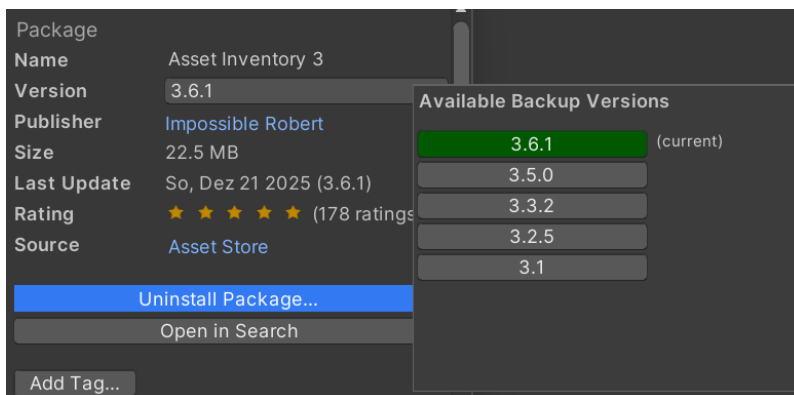

Saved Package Searches

Store current search and make it easily retrievable, also in custom actions

Project files	1,179	Paid packages	2	Standard Unity Asset Store EULA
Identified packages	26	Used Licenses		
Identified files	517 (44%)			
Name	Indexed Files	License	Version	
-Unidentified-				
Asset Inventory 3	151	-default-	3.6.1	
Asset Store Tools	0	-default-	12.0.1	
Audio Tools	28	-default-	1.0	
Assets (28)				
Tools (28)				
AudioTools (19)				
Documentation (1)				
Editor (15)				
Scripts (7)				
Core (5)				
AudioManager.cs	28	-default-	1.0	
AudioProcessor.cs	28	-default-	1.0	
AudioWaveformRenderer.cs	28	-default-	1.0	
FileAudioSource.cs	28	-default-	1.0	

Files in Reporting

Identified and also unidentified files directly in the reporting tree, allow actions on selected files

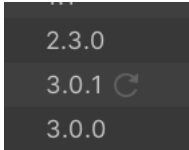

Versions Support for Asset Store Packages

Import older versions of Asset Store packages if these were backed up before

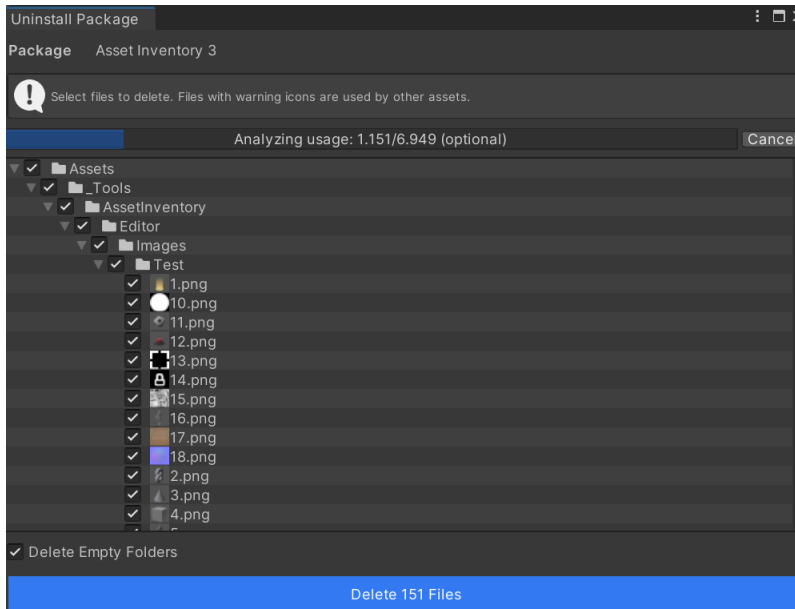

ASSET INVENTORY – WHAT'S NEW

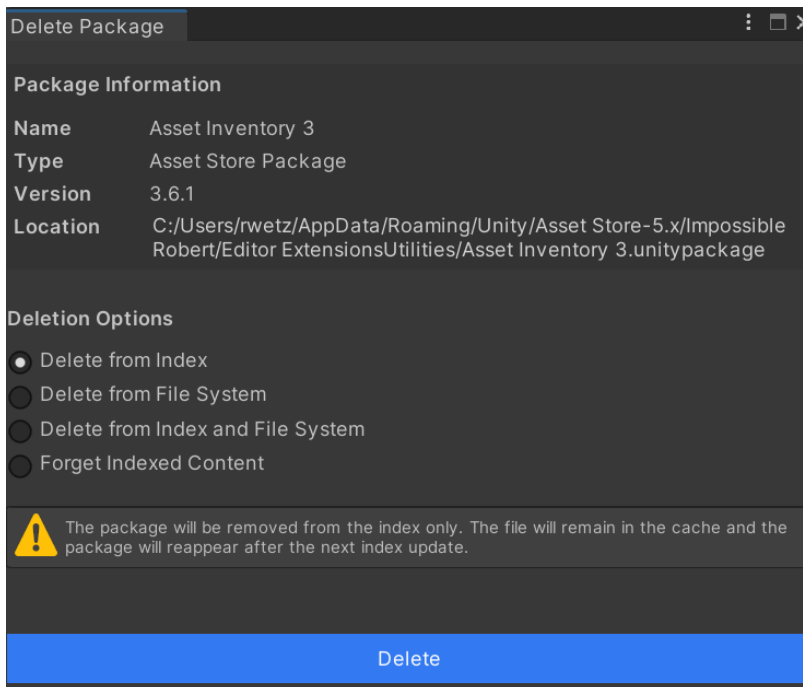

Reindex Indicator

Quickly see if packages are scheduled for indexing (e.g. after an update)

Uninstall Support

Remove imported Asset Store packages fully or partially

Unified Delete Feature

Single action to delete from file system, database and more, single and bulk

ASSET INVENTORY – WHAT'S NEW

Package Data

! Change the values below to update the package data. The technical names are mandatory if you want filters or selection dropdowns to work properly.

Type: Directory

Location: D:/Dropbox/AssetLibrary/Kenney Game Assets All-in-1 3.3.0/Archive/Tower Defense Assets Change...

Name: Tower Defense Assets

Technical Name: D:/Dropbox/AssetLibrary/Kenney Game Assets All-in-1 3.3.0/Ai

Save

Edit Package Data

Adjust metadata for more package types, select from existing values

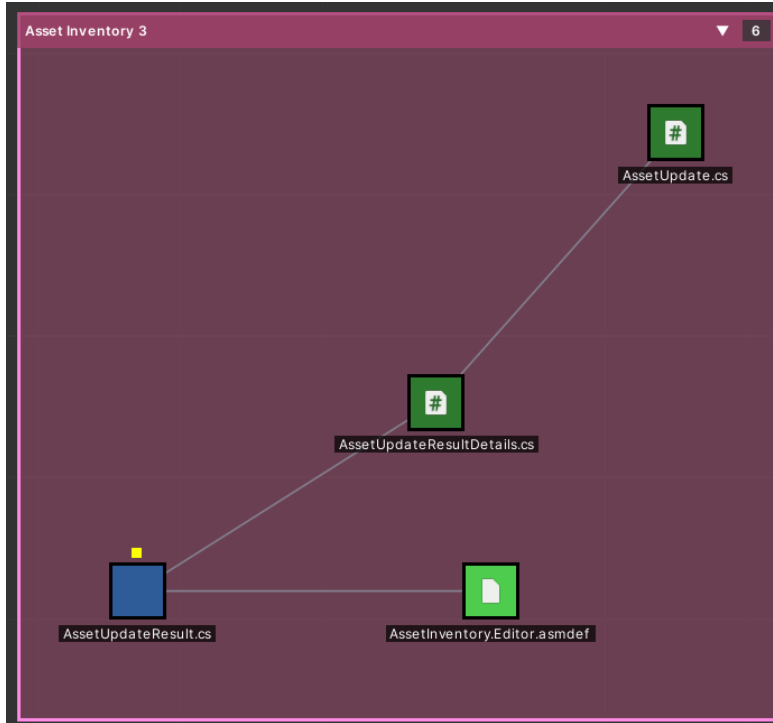

Graphical Dependency Viewer

Dependencies between assets and even packages in a graphical tree structure

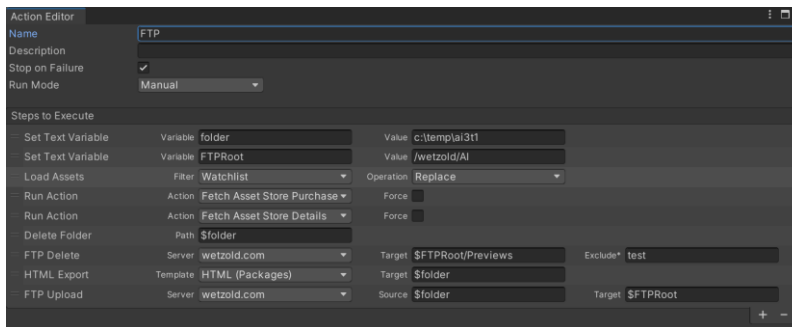

ASSET INVENTORY – WHAT'S NEW

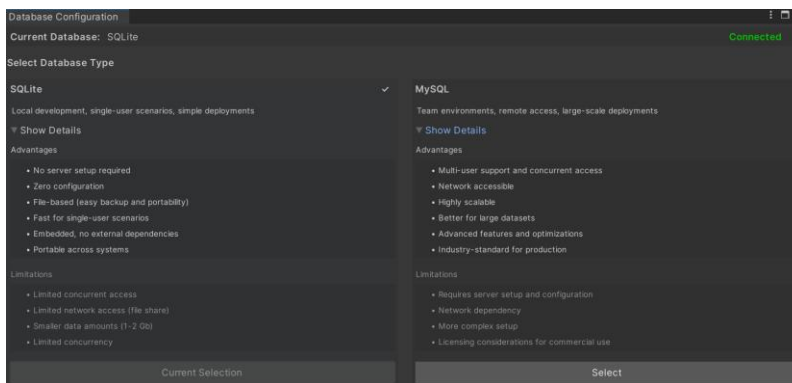

Script Dependencies

Detect & import all scripts and *asmdefs* required for compilation

New Custom Action Steps

FTP, data loading, file operations, tagging

MySQL/MariaDB Support

Alternate backend for storing data, making it easier for teams to use the same database

Enable Database & Config Backups ☒

Backup Interval (days)

7

Number of Backups to Keep

2

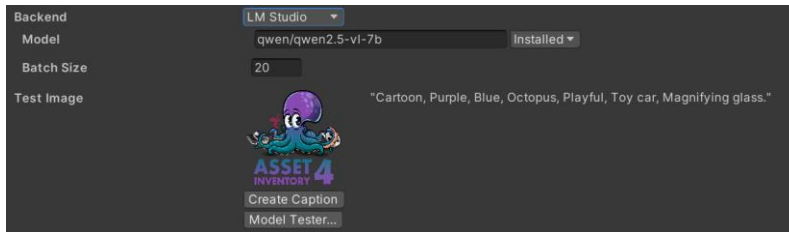

Backup Now

Database & Config Backups

Regular snapshots of the database and

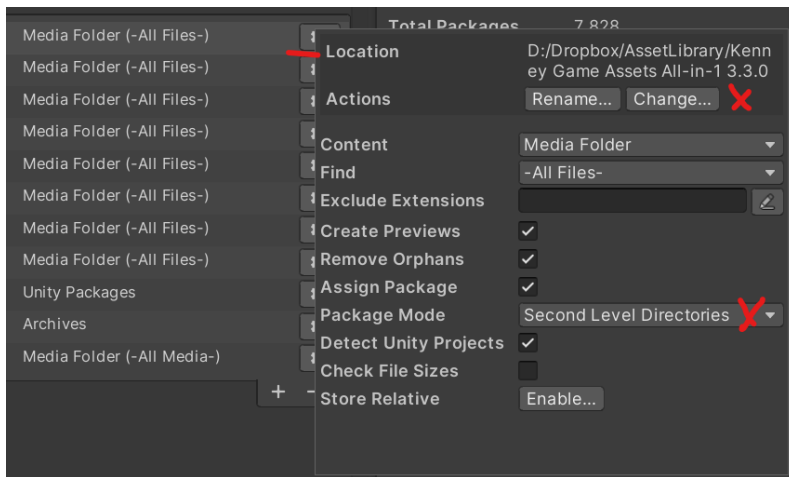

ASSET INVENTORY – WHAT’S NEW

configuration to go back to a working state easily

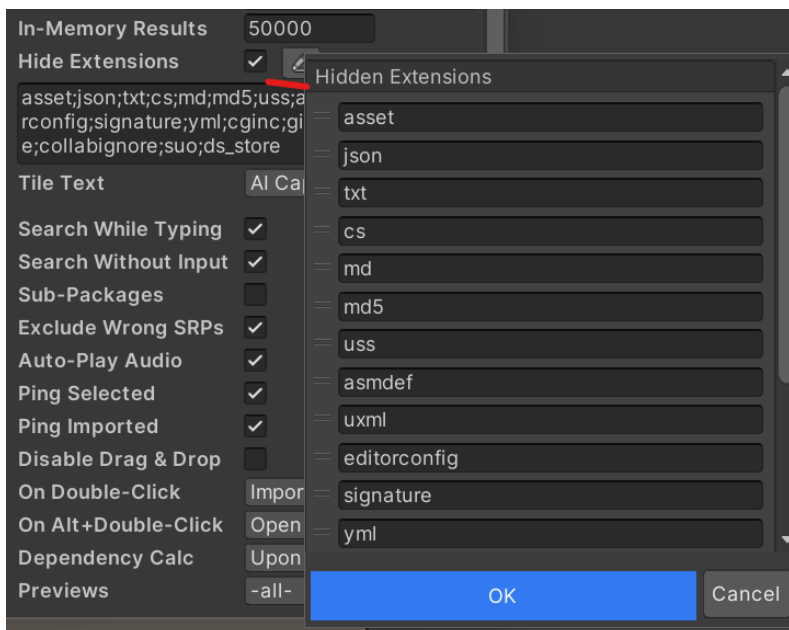

LM Studio Support

Additional models, no third party conflicts as it requires no additional dependencies

Additional Folders Management

Package mode (root, first or second level) to automatically create packages per directory, rename and manage folders

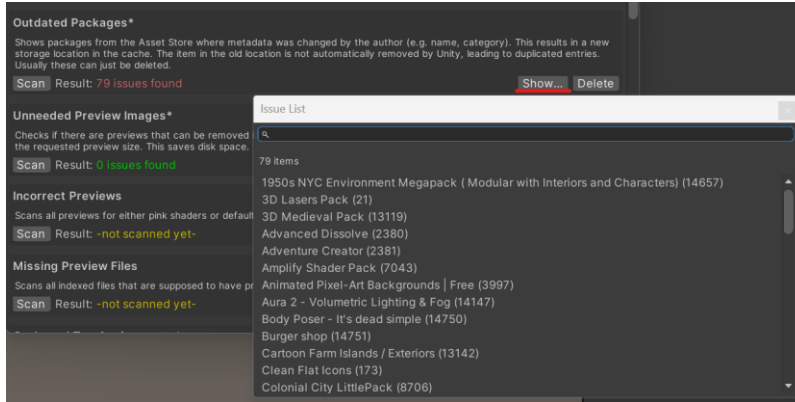

List Editors

Easily add, edit & remove items in settings for string lists

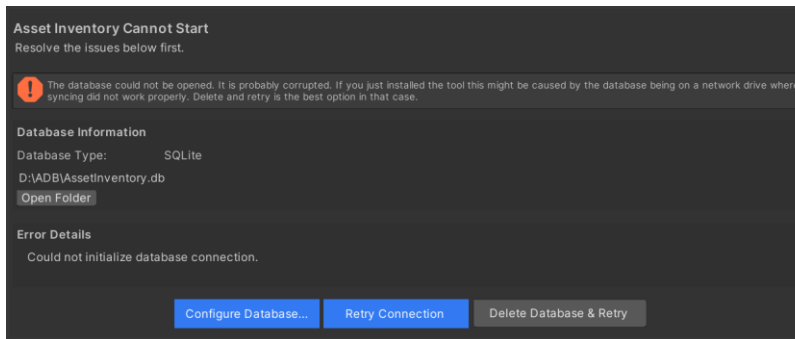

ASSET INVENTORY – WHAT'S NEW

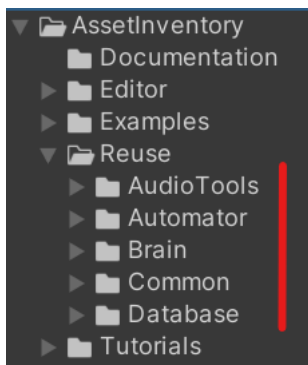

Improved Maintenance

Additional validators, ability to see and search through potentially huge lists of issues

Failure Management

Gracefully handle configuration and database issues, stop further execution to safeguard data, self-help tools

Internal Rework

Complete internal overhaul, Unity 2021.3 as the new minimum allowing significant cleanup, better API, independent features extracted as packages
